Address: Ha noi,Viet Nam

OBJECTIVE

Third-year Software Engineering student at **FPT University** seeking a **Backend Developer Internship** at FPT Software. Hands-on experience building a production-style Warehouse Management System with **Java (Spring Boot)**, applying industry-standard practices such as **RBAC**, **audit logging**, and **CI/CD pipelines**. Eager to apply these skills on real client projects, learn from experienced mentors, and grow into a reliable backend engineer within a global technology environment.

EDUCATION

Oct 2023 - Present

FPT University

Major: Software Engineering

GPA: 3.3/4

WORK EXPERIENCE

May 2026 - Present

Warehouse Management System (WMS)

Backend Developer

Developed a warehouse management system supporting inventory, inbound and outbound operations, inter-warehouse transfers, stocktaking, returns, quarantine, and disposal workflows.

- Designed the database schema and developed RESTful APIs using Spring Boot and PostgreSQL.
- Implemented Spring Security, JWT authentication, RBAC, audit logging, FIFO inventory, optimistic locking, and negative-inventory prevention.
- Applied SDD, TDD, DDD and AI-assisted development for requirement analysis, implementation planning,testing, and code review.
- Containerized the application with Docker, managed migrations using Flyway, and deployed PostgreSQL on Supabase.
- Technologies: Java 21, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, Supabase, Flyway, Docker, Maven, GitHub Actions CI/CD pipelines for compilation, testing
- Website: Under Active Development
- GitHub: https://github.com/Manager-warehouse/Manager-warehouse-sdd

ACTIVITIES

Jan 2026 - Present

FPTU JS Club - Japanese Software Engineers

Technical Department Collaborator JS Club

The Japanese Software Engineers Club is a gathering place for those who are passionate about Japanese and programming at FPT University.

- Develop some software applications: Vibe match a dating/social matching application, as part of the club's technical projects.
- Contributed to building a vibrant club culture by organizing academic workshops and team-bonding to foster member growth.

CERTIFICATIONS

Jan 2026	Software Engineering Specialization
June 2025	Web Design for Everybody: Basics of Web Development & Coding Specialization

SKILLS

Communication skill	Clearly communicate technical ideas, requirements, and project progress.
Teamwork skill	Collaborate effectively using Git, GitHub, code reviews, and shared specifications.
Problem-Solving Skill	Analyze business requirements and design reliable backend solutions.
Time Management Skill	Prioritize tasks and deliver features according to sprint plans and deadlines.
IT Proficiency	- Backend: Java 21, Spring Boot, Spring Security, JWT, JPA - Database: PostgreSQL, SQL Server, Flyway (migrations) - DevOps: Docker, Maven, Supabase, GitHub Actions CI/CD - Practices: SDD, TDD, AI-assisted development
Language Skills	Vietnamese: Native English: Able to read technical documentation and communicate at an intermediate level.
